### Push-to-Talk Over Cellular (PoC) Radios

- Nationwide Coverage with Wi-Fi and 3G/4G/LTE Networks
- Supports Dispatching, Group Calling, and Location Tracking
- Compact and Rugged Radios that are Easy to Use

### Nationwide Group Communications Solution

The PNC370 is part of the Hytera HALO Nationwide Group Communications Solution that enables Push-to-Talk over Cellular using Wi-Fi and the existing 3G/4G/LTE infrastructure of Mobile Network Operators. Hytera HALO Dispatch is the powerful interface to efficient group communications and location tracking.

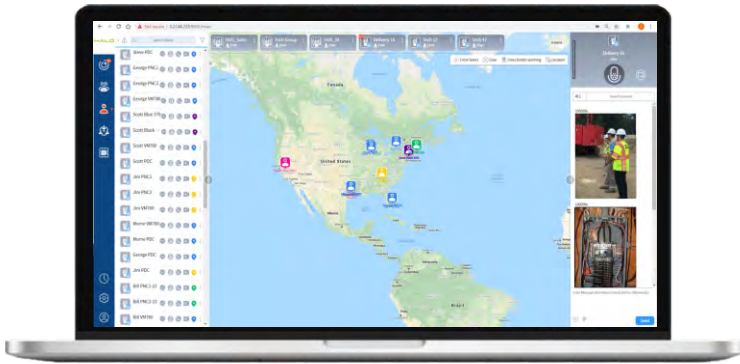

## PNC370 KEY FEATURES

The PNC370 is a compact, durable, and easy-to-operate handheld radio that enables connectivity over 3G/4G/LTE and Wi-Fi for wide-area radio communications. PNC370 PoC radios and Hytera HALO Dispatch can be deployed very quickly to deliver these features at a lower cost than traditional radio systems.

  - Improves worker safety and emergency response time

The PNC370 and other Hytera PoC radios and bodycam radios are part of the Hytera HALO Nationwide Group Communications Solution that includes a powerful web-based dispatch application.

Hytera HALO Dispatch leverages the GPS built into the PNC370 for tracking of driver locations and travel routes with time stamps. Hytera HALO Dispatch supports instant group calling as well as individual calling for the most flexible calling available. Dynamic groups can be quickly created with a simple list selection or geographically by selecting an area on the dispatch map. The dispatcher may stun (turn off) and reactivate a radio, perform Lone Worker monitoring, receive emergency alarms, and access full call recording, logging, and playback.

The PNC370 is also supported on Hytera HALO OnSite, a Wi-Fi based radio system for use in hospitals, arenas, schools, convention centers, and other large facilities with Wi-Fi access.
